About Me

I am a student at the Sepuluh Nopember Institute of Technology with a strong interest in construction engineering, water resources infrastructure, technical drawing, and field project implementation.

I possess a strong understanding of technical planning and implementation concepts, and am accustomed to working on projects based on systematic analysis and problem-solving. Supported by skills in calculation analysis and project documentation, I am able to provide structured and effective contributions.

I am known for being disciplined, adaptable to new work environments, and highly motivated to learn. With a practical and results-oriented approach, I am committed to continuously developing my competencies and providing reliable technical support in every project I work on.
